# WASHING MACHINE

## 8kg Front Loader Washing Machine

WMA8168LB1

Steam Therapy

Auto Program

Memory Function

Prosmart Inverter Motor

Anti Allergy+ Program

### Performance

- Energy Rating: 3.5 Stars
- Water Rating: 5 Stars
- Maximum Spin Speed: 1600 rpm

### Technology

- Prosmart Inverter Motor
- Aquawave™ Drum Technology
- Duo Spray Technology

### Specifications

- Time Delay: 1-24 hours
- Remain Time Display

- End of Cycle Alarm
- Dual Water Inlet

### Programs

- Number of Programs: 16
- Auto Program, Cottons, Cotton Eco, Anti Allergy+, Daily Quick, Quick 14', Wool, Sports & Outdoor, Spin+Drain, Rinse, Steam Therapy™, Hand Wash, Delicates, Bedding & Blankets, Shirts, Synthetics

### Auxiliary Functions

- Auxiliary Function-1: Prewash
- Auxiliary Function-2: Quick Wash
- Auxiliary Function-3: Extra Rinse
- Auxiliary Function-4: Memory

### Safety

- Over Flow Safety
- Child Lock
- Watersafe+

### Dimensions

- H x W x D: 84.0 x 60.0 x 60.0 cm

### Manufacturers Warranty

- 2 Years

### Matching Tumble Dryers

- DPY8500, DCY8502XB1

## Features from our Range

1

### PROSMART™ INVERTER MOTOR

HIGH  
EFFICIENCY

HIGH  
DURABILITY

LOW  
NOISE LEVELS

Official partner of...  
**allergic-to-ironing types**

Who's got time to iron? If you feel like there's never enough time in the day, then you'll love the SteamTherapy® Program technology in Beko washing machines. You can cut down on the wrinkles in your laundry by up to 58%\* and helping decrease odours on your clothes. \* Tested by 3rd party laboratories

2

### STEAMTHERAPY® PROGRAM

3

### AUTO PROGRAM

Official partner of... **load-and-go types**

The Beko AutoProgram and smart sensors will automatically work out what type of fabric you've put in, how many clothes there are and choose the right washing program; cotton, synthetics, blended, all done. Washing your clothes can be easy. Now you can get on with loads of fun stuff instead.

28mins  
FOR FULL  
CAPACITY

4

against  
FLOODING

5

### WATERSAFE+™

Also includes these additional features

AQUAWAVE®  
SYSTEM

DUCSPRAY®

QUICK (14')  
PROGRAM

ULTIMATE  
WOOL CARE

# BEKO INNOVATIVE DRYING TECHNOLOGY

Did you know the innovative drying technology in our state-of-the-art washer dryer can save you thousands of litres of water per year, compared to standard machines? This advanced design, along with a 4 Star Energy rating, means washing and drying your laundry is now more affordable than ever before.

## Standard Washer Dryers

Contrary to popular belief, traditional drying cycles on a combined washer dryer can, in some cases, use almost as much water as the laundry washing cycle itself. Normally, the condenser is used to remove the moisture from the hot air in the drum, transforming it into water which goes down the drain. The condenser gets hot during this process and, in standard washer dryers it is cooled using cold water from the household supply. This process is very wasteful and models using this method are a particularly poor choice for those who are water conscious.

## Beko Air Dry Washer Dryer

In contrast the Beko washer dryer uses ambient air, drawn in through the perforated vent on the front of the machine, to cool the condenser. This is then blown out through the back of the machine, a technique that can significantly reduce water consumption. Incorporating clever air cool technology, this machine can save up to 7,500 litres of water per year, the equivalent of 95 bath tubs\*.

With a super speedy washing cycle, our Beko WDA8514AT washer dryer cuts the time it takes to do everyday household chores. It has the capability to wash and dry a 5kg load all in one cycle time of 60mins, meaning you can move on with other jobs without having to be on hand to start the drying cycle or spend time hanging out the washing.

It is also equipped with an anti-allergy wash and dry cycle for small loads, endorsed by Allergy UK\*\*, which helps to reduce the amount of allergens, such as dust, germs, pollen and air pollution so you can be rest assured you're protecting your family and yourself.

\* Based on a comparison with a model with same capacity and with standard technology and considering the average yearly water consumption for 208 washing cycles at full capacity (8kg) and 156 drying cycles at full capacity (5kg), and using an average bath tub capacity of 80 litres.

\*\* At 60°C, provides 99.9% hygiene. At high temperature (60°C), super rinsing cycle provides perfect rinsing and anti-allergic results. At this temperature, also pet allergens, mites as well as pollens are removed – as approved by the British Allergy UK Foundation with the Allergy UK Seal of Approval. The testing is carried out by an independent laboratory to protocols which have been created for the Seal of Approval by leading allergy specialists, specifically to benefit the sufferers of allergy, asthma, sensitivity and intolerance.
